## 2009 Iowa Seed Directory

### *Preliminary Issue*

This is a preliminary listing of the acres of small grain that were applied for field inspection in 2009. A complete listing of all crops that were applied for field inspection in 2009 will be issued this fall.

The crops listed in this directory were grown by members of the Iowa Crop Improvement Association. The number acres for each class of seed is shown in the columns REG for Registered seed, CER for Certified seed, and QA for Quality Assurance seed.

The seed produced on these acres cannot be considered as certified or Quality Assurance seed until it has passed field inspection, seed standards have been met, and the seed is properly labeled. Prior to buying seed from a grower listed herein, the purchaser should inquire as to whether these steps have been completed. The certification or Quality Assurance tag on the container is assurance the seed has met these criteria.

## CERTIFIED

*The Sign of Good Seed*

Seed Certification is a service for those who wish to produce high quality seed of known genetic purity. It is also an assurance to the consumers of seed that they are getting the varieties they desire.

There is a strong tendency for seeds to become mixed during general use among farmers. To be certain you get trueness to variety and a high yield potential, buy certified seed every year.

Don't risk getting an unknown variety by purchasing uncertified seed.

## IOWA NOXIOUS WEED SEED FREE FORAGE AND MULCH CERTIFICATION

Are you looking for clean forage or mulch?

Iowa Crop Improvement Association's Web site now has the ability to connect suppliers and purchasers of certified forage and mulch by offering individuals the opportunity to be included on the following lists:

- Potential suppliers
- Potential purchasers
- Current sources of certified forage and mulch

Iowa Crop Improvement Association began offering a certification program in 2006 to assure forage and mulch is free of weed seed of 54 noxious or undesirable plants. The program complies with the Weed Free Forage Standards developed by the North American Weed Management Association.

The following producers have certified products available or have applied for inspection of their forage and/or mulch.

### Forage

| County | Content | Name & Phone                                  |

## Certification Tag

It's your assurance that the seed you buy meets the high standards of certification. Demand it when you buy seed!

It tells you the seed in the container has been carefully grown, harvested, and conditioned to assure it is true to the variety description. The analysis, printed on a separate tag, gives the specific information about the seed in the container. If you buy by the tag you can be sure of your purchase.

Always buy from a reputable, reliable source. They work hard to provide good seed because they want your business next year and for years to come.

And remember, buying seed with an Iowa certification tag means it is field inspected and laboratory tested.

***Good Seed Doesn't Cost, IT PAYS!***
